

# Donor Conceived Australia

Donor Conceived Australia aims to be the peak body for donor-conceived people in Australia. We provide **support** for donor-conceived people, **education** on donor conception for both current and prospective parents and donors as well as the wider community, and **advocacy** for nationally consistent legislation.

We offer support, education and advocacy on behalf of people conceived via Assisted Reproductive Treatments (ART) – including sperm, egg and embryo donation throughout Australia.
